

7th Annual John H. Holdridge Memorial Lecture

The current US Administration has done a solid job of managing America's bilateral relations with China, and the US-China relationship is now wide-ranging, mature, and complex. But the agenda for the next US Administration will broaden in important ways, and the key issues shaping the relationship may be very different from those of recent years. How the US navigates those differences may have significant implications for all concerned parties on both sides of the relationship. Such questions will be explored by Dr. Kenneth Lieberthal, a well-known China specialist.
