China, Korea and Taiwan are among Asia's leading economies. As important destinations for U.S. exporters of goods and services, China, Korea and Taiwan are the U.S.'s 3rd, 7th and 10th largest trading partners, respectively. In 2007, U.S. and Maryland exports to these three markets were over \$126 billion and \$692 million, respectively.

Who Should Attend: If your business is interested in expanding exports, come learn from first-hand experience what it takes to successfully do business in these markets and how to sell your products to their consumers!

Contact TowsonGlobal with questions or for help registering for the event.
